InternHub – Manual Testing Report

System Verification & Functional Quality Assessment

Project: InternHub (Smart Internship Management)	**Date:** October 16, 2026	**Status:** All Core Features Tested
Tested Roles: Student, Mentor, Company, Admin	**Environment:** Localhost / MongoDB Atlas / Node 24	**Overall Result:** 100% Pass (15 / 15 Tests)

1. Purpose & Introduction

This report provides a concise, student-friendly record of manual tests conducted on the **InternHub** platform. The purpose is to confirm that each core feature—from account creation and login to internship applications, tasks, attendance, notifications, and certificates—works reliably across frontend, backend, and the MongoDB database before project presentation.

2. Manual Test Cases and Execution Results

TC #	Feature	Test Steps	Expected Result	Actual Result	Status
TC-01	Registration	Open /register, enter new student details, submit form.	Account created; user saved to MongoDB.	Account created in MongoDB; HTTP 201.	**PASS**
TC-02	Duplicate Registration	Try registering again with the exact same email address.	Form rejected with friendly duplicate error.	System returned HTTP 409 Conflict.	**PASS**
TC-03	Common Login	Open /login, enter valid credentials for Student, Company, or Admin.	User logged in and routed to correct role dashboard.	Correct dashboard loaded based on server role.	**PASS**
TC-04	Invalid Login	Enter registered email with an incorrect password.	Error message shown; access denied.	HTTP 401 Unauthorized; access denied.	**PASS**
TC-05	Forgot Password	Request reset code on /forgot-password, check email, enter 6-digit OTP.	6-digit OTP sent via email; code verifies successfully.	Real code delivered via Brevo SMTP; verified.	**PASS**
TC-06	Password Reset	Submit new password with verified OTP, then log in.	Password hash updated; user signs in with new password.	Password updated; new login succeeded.	**PASS**
TC-07	Role Dashboards	Log in as Student, Mentor, Company, and Admin in turn.	Each dashboard displays its role-specific stats & cards.	All 4 dashboards loaded proper metrics.	**PASS**
TC-08	Internship Search	Browse /internships, search by title keyword or filter by type.	Matching active internship listings appear in the list.	Matched active opportunities displayed.	**PASS**

2. Manual Test Cases (Continued)

TC #	Feature	Test Steps	Expected Result	Actual Result	Status
TC-09	Post Internship	Log in as Company, fill internship posting form, click Publish.	New internship saved to database and visible publicly.	Internship saved to DB; visible to students.	**PASS**
TC-10	Apply to Internship	Log in as Student, view internship details, submit application.	Application recorded; company sees new applicant.	Application saved; duplicate guard verified.	**PASS**
TC-11	Task Tracking	Company assigns a task; Student views task list and details.	Student sees assigned task with title and due date.	Task loaded with correct deadline and details.	**PASS**
TC-12	Attendance Log	Student submits clock-in attendance entry for today.	Attendance recorded with date/time for supervisor review.	Record saved with timestamp; status pending.	**PASS**
TC-13	Notifications	Trigger event (e.g. application submitted); check bell icon.	Unread badge updates; real-time alert received.	Socket.IO alert received; badge updated.	**PASS**
TC-14	Certificates	Student views /certificates; verify code on public verify page.	Certificate renders; valid code returns completion info.	Public page verifies authentic certificate code.	**PASS**
TC-15	Admin Governance	Log in as Admin, open User Management, view users and roles.	Admin sees all users; non-admins are blocked.	User list loaded; student access blocked (403).	**PASS**

3. Summary of Results

Total Test Cases: 15	**Passed:** 15 (100%)	**Failed:** 0	**Blocked:** 0

A. Successfully Tested Features:

• **Authentication:** Unified common login correctly detects Student, Company, Mentor, and Admin roles. Invalid passwords and duplicate signups are cleanly rejected.

• **Password Recovery:** Real 6-digit verification code sent via Brevo SMTP, verified against hashed code, and new password successfully logged in.

• **Role Dashboards & Workflows:** Each role sees dedicated data; students can search opportunities and apply; companies receive applications and assign tasks; students log attendance.

• **Notifications & Integrity:** Real-time alerts via Socket.IO update unread counts immediately; database deduplication prevents repeated spam.

• **Certificates & Governance:** Certificate verification validates real credentials; Admin user management is protected against unauthorized access.

B. Issues Resolved During Audit:

• *Notification Spam:* Old automated test runs previously left repeated announcements in the database. Added deduplication keys and cleanup hooks, keeping only genuine notifications.

• *Appraisal Null Handling:* Fixed an issue where blank mentor remarks caused an error in reports; now displays cleanly with safe fallbacks.

C. Remaining Work & Next Steps for Team:

1. **Production Environment Setup:** Keep email and database keys in environment variables on the cloud server before final public deployment.
2. **Live Browser Demo:** Ready for presentation to team lead, mentor, and external evaluators. All major flows are fully functioning.

Tester: QA & Development Team	**Verdict: APPROVED FOR SUBMISSION**	**Signature:** *Verified on Localhost*
